

I am a XM subscriber. I also am a blind individual who lives in Cincinnati. I really enjoy my XM service because it allows me to have multiple means of getting music, sports and talk for a minimal price per month. I am able to listen to my favorite music and get up to date news stories and opinions from others around the country on the various talk shows. I do not feel that my ability to have this for pay service should be controlled by private radio individuals. If this is the case then shouldn't cable, satellite and other forms of for pay media be stopped because it could affect local media outlets? I feel that this service is invaluable especially when you are on the road. For example, we took a trip with our children last summer and thanks to the XM radio signal we were able to sustain a consistent signal so the kids had their kids channels to keep them entertained and my wife and myself had news, music and radio shows to keep us entertained as well. Since I don't drive, it made the drive a lot easier on my wife to have a variety of options to listen to. Please protect my right to have this service in which I choose to pay for.
